 - V. Click Add button to add the language.
 - VI. Punjabi font added successfully.
 - VII. User can swap through English or Punjabi language by pressing Alt + Shift key.

4.0 RCMSPB Modules

RCMSPb application has following modules

Case Details Entry Module: This module is to be operated by Reader and it facilitates capturing General details pertaining to particular case under litigation, Petitioner details, Respondent details, Land details like kehwat no., khatauni no., khasra detail and previous cases details. RCMSPB is tightly integrated with Land Record System (LRS). All the master data like tehsil, village, patwar circle, kanungo details kehwat no., khatauni no., khasra detail are directly fetched in RCMSPb application. RCMSPb facilitates to final save the data once all the details pertaining to particular case are entered by Reader. Reader can also view the case details of particular court case entered by him. Once the case details are final saved in RCMSPb land related details are automatically updated and court cases details (like Court name, Case No., Case Year) are reflected in Remarks column of jamabandi.

Old Case Entry Module: This module is to be operated by Reader and facilitates the entry of old cases (backlog data). It is used to enter the pending cases of the court which were manually handled by court before the implementation of RCMSPb.

Caveat Entry Module: This module is also handled by Reader and used for entry of Caveat cases in the situation where the case winning party appears in higher courts before the appeal of other party.

First Hearing date Entry: This module is used to facilitate for entering the first hearing date of court cases. Once the case has first hearing date then SMS will be automatically sent to the litigants.

Personal details updation: It facilitates Reader to update the mobile number and email of Petitioner/Respondent for a particular case.

Daily Proceedings updation: In this module Reader user enter/update the daily proceedings of the particular case, enter next hearing date and put Zimni (interim order) orders through the interface.

Attendance Details: This module captures the attendance of Petitioner and Respondent present on particular date of hearing. It prompts Reader to enter the date of hearing and RCMSPb will display the list of all the cases which are heard on this particular date. It also facilitates Reader to mark the attendance of petitioner/respondent.

Document upload: In this module, Reader uploads the document (like General document, Legal notice, interim order, final order and summons). The document file can be uploaded in PDF format having maximum size of 5MB. This module also facilitates Reader to view the various types of document uploaded by him for particular case.

Postponement of hearing date: This module facilitates Reader user to postpone of hearing date(s), which are due for hearing on particular date. It will prompt the operator to enter hearing date and application will display the list of cases which due for hearing on this particular date. Operator can enter the next date of hearing and time of hearing. SMS will be automatically sent to parties for the next date.

Update Case initiation: The cases are initiated in the following modes:-

- a) Direct
- b) Remanded
- c) Suo-Moto Reference

User Manual ver. 2.0 Page **5** of **57**

In earlier phase the case initiation mode was not captured. Therefore the provision to enter mode of case initiation was added for the cases already saved without case initiation mode.

Case Transfer: This module is available for state user and Admin user of DC court. This module facilitates the transfer of cases from one court to other court within a district by using the filter of case type and date.

Case Updation: This module is available for stateuser. This module facilitates the updation (Unfreeze, Court Fee, Case Type, Case Status) of case by choosing Court and Case Number.

FC District Allocation Detail: This module facilitates stateuser to change the allocation of Court Cases of Financial Commissioners by selecting the Districts and Case Types.

Old Orders: This module facilitates stateuser to upload the previous court orders, which are not entered in RCMSPb.

Reconciliation: This module is used by the stateuser for Reconciliation of online payments (HDFC PayU integration) of demarcation of land.

Reconciliation (NECIS): This module is used by the stateuser for Reconciliation of online payments (IFMS PayU integration) of Non-encumbrance certificate.

Master Details: In this module, stateuser has the facilities to create and manage the master data. The stateuser has to create the following master data in order to create new courts:-

- 1. Designation Master
- 2. Officer Master
- 3. Court Details
- 4. User Management (for creation of Court Admin)

In this module other masters are as follows:-
